What's New in TestArchitect 8.5 Update 1

The following new features and improvements are introduced in the latest version of TestArchitect running on Windows.

TestArchitect Client

Enhancements to existing features

- **Repository Versioning:** From 8.5 Update 1 onward, as long as TestArchitect Client and Repository Server share the same major version number, they can work with each other without any compatibility problems.

TestArchitect Automation

New features

- **SAP Support:** TestArchitect support for SAP has been complete for all major controls and the following SAP controls have been newly supported:
 - Calendar
 - Richtext
 - Frame
 - Password field
 - Status bar
 - Combo-box

Additionally, TestArchitect now supports **unlock container classes** and **class mapping** for SAP.

Enhancements to existing features

- **Support for Chrome 80, 81 and Firefox 74, 75:** Now you can run automated tests for web pages with the latest versions of Chrome and Firefox.
- **Execute command in Window JP:** Support two encoding types of **charset** in execute command:
 - **Shift-JIS:** Encodes the file with Shift-JIS format. Recommended for use with Windows with Japanese characters.
 - **UTF-8:** Encodes the file with UTF-8 format.

System Requirements

The following table lists the recommended hardware and software requirements for TestArchitect.

Recommended system requirements

	TestArchitect Client/Controller with small-scale Repository Server	Production-scale Repository Server (up to 15 concurrent connections, 1GB repository)
