What's New in TestArchitect 8.5 Update 1

The following new features and improvements are introduced in the latest version of TestArchitect running on macOS.

TestArchitect Client

Enhancements to existing features

- **Repository Versioning:** From 8.5 Update 1 onward, as long as TestArchitect Client and Repository Server share the same major version number, they can work with each other without any compatibility problems.

System Requirements

The following table lists the recommended hardware and software requirements for TestArchitect.

Recommended system requirements

	TestArchitect Client/Controller with small-scale Repository Server	Production-scale Repository Server (up to 15 concurrent connections, 1GB repository)
Operating system	El Capitan (10.11), Yosemite (10.10) (Learn more)	Windows 2008/2012/2016/2019 Server
RAM	4 GB	8 GB
HDD	At least 2.5GB available space	Available space of at least 2GB plus the total aggregate size of all databases
CPU	2 GHz dual-core or faster	3.1 GHz quad-core
